Making Entertainment Easy

A HARLEYSVILLE KITCHEN & MUDROOM MAKEOVER

Designing a Home-Cook Haven

A Welcoming Space to Wine & Dine

This Harleysville homeowner wanted an open and updated kitchen that could accommodate her love of cooking, entertaining, and spending time with her son and dog. The Custom Craft team was happy to help with some creative rearranging and thoughtful design.

While the existing walk-in pantry was great in theory, its awkward placement and design weren't the best use of space — instead of spacious storage, it ended up as a catch-all for odds and ends. The Custom Craft design team knew right away its size and central location would be the perfect spot to relocate the powder room. We also added gorgeous new cabinets in the breakfast room and a center island packed with storage, so there's still plenty of space for kitchen essentials. Additional cabinets flank the new 6-burner stove, with an elegant range hood overhead that boasts custom wood trim to match several other wood details found throughout the kitchen and dining room.

Simple, Stress-Free Dog Washing

Relocating the powder room from the entrance to a more central location freed up space for an ultra-convenient mudroom with dog washing station. With a low-mounted, handheld faucet and a wide space to move around in, cleaning this household's furriest family member has never been easier. This station can also be used to rinse off muddy sports equipment, shoes, or other wet outdoor gear.
